

The Next Generation of Personal Productivity

- Ultra lightweight and portable - less than 2 pounds
- Connected - built in WiFi
- Secure web browsing, e-mail and entertainment
- Easy effortless access to the most popular web applications

At just under two pounds, the **g** netbook by **SYLVANIA** brings you ultra light portability and wireless Internet connectivity built right in. Using reliable architecture and gOS's innovative operating system, the **g** netbook is a lifestyle solution keeping you connected and mobile.

Using Google and Web 2.0, gOS utilizes Linux-based software to provide a robust and diverse set of applications simple enough for users to dive right in. Next generation Google applications optimize productivity with office tools, email, and web-linked favorites like Myspace and YouTube on the desktop. These features combined with its superior battery life and optional accessory kit provide a truly portable and effortless net-computing experience - the next generation of personal productivity.

The **SYLVANIA g** netbook provides:

- Web browsing, E-mail, Instant messaging
- Social Networking: Facebook, MySpace, YouTube
- Office applications including Documents, Spreadsheets and Presentations compatible with Microsoft Office
- Photo editing
- Internet phone calls
- Support for Flash, PDF, and other major formats

What is the gOS operating system?

Good Design - A stunningly beautiful desktop that fits in your backpack.

Good Applications - A dock of icons with the most popular web apps from Google, MySpace, Amazon.com, as well as a "What's good..." feature that guides you into using the web to improve your everyday life.

Good Technology - Built on a solid Linux 2.6 kernel and the widely supported GNOME desktop environment.
